Date

Signature:

*Active4me Site Coordinator Use*

ISSUED CARD #:

SCHOOL:

Students register, receive a scan tag to attach to their backpack, get scanned by Active4me Parent Volunteers by the school's bike rack, each day that they use active transportation to get to school. The program captures every trip and can instantly notify a parent by text, email or phone that their student arrived on campus. The system generates real-time statistics including CO<sub>2</sub>, calories, miles and gas savings for each student, their classroom, grade, or for the whole district, and is currently active at 8 of our local elementary schools
